

# SCOTS KIT

FG015-0011-00NA

## Specialized Chemical Ordnance Transport System

**FASTACT**<sup>®</sup>

**Includes:**

**2x Ordnance Support Stand**  
**4x Ordnance Containment Drybag**  
**2x Individual Decontamination System (Optional)**  
**2x Sprayer**  
**2x 2x2 Roll Up Sump**  
**2x Cutting Tools**  
**2x Mono Tape**

\*Subject to change

**10x 7mil Poly Bags**  
**2x Scrub Brush**  
**Decon Media That Includes:**  
**8x FAST-ACT Mitts**  
**2x General Purpose Decon**  
**2x FAST-ACT Powder**  
**4x Pipe Wrap**  
**1x Hot/cold Line**  
**1x Speedbox**

### **FAST-ACT SCOTS Kit:**

The SCOTS Kit (Specialized Chemical Ordnance Transport System) is a system that was developed in conjunction with ARMY, Navy and Marine Corps EOD feedback, knowledge and real world experience for the sealing, containment and transport of unexploded chemical munitions. The system uses proven decontamination technology, along with validated procedures, to standardize a system that helps accomplish the mission of neutralizing and transporting unexploded chemical ordnance.

The above mentioned technologies, combined with the components found in the fully validated individual decontamination system, make this a multi-use system for the sealing and containment of chemical rounds, and also provides the ability to perform a hasty decontamination of personnel after handling potentially contaminated material. The entire system is contained in a portable transport case, and can be tailored with enough decontamination media and containment bags for multiple chemical round scenarios.
